ABDULLAH RASHID

Full-Stack MERN Stack Developer

abdullahrashid8878@gmail.com | linkedin.com/in/abdullah-rashid-658a78430 | github.com/abdullah-rashid8878

SUMMARY

Full-stack developer who builds modern, responsive and scalable web applications using React, Node.js, Express.js and MongoDB, with a focus on clean interfaces and secure REST APIs. Currently studying BS Artificial Intelligence and open to freelance projects.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Redux
Backend: Node.js, Express.js
Database: MongoDB
APIs & Authentication: REST APIs, JWT Authentication
Tools: Git, GitHub, VS Code

PROJECTS

Attendance System API
Backend attendance management system with role-based access (admin, manager, employee), leave requests and automated reports. Built with Node.js, Express.js, MongoDB and JWT.

React Trello Clone
Task management application inspired by Trello, with boards, lists, cards and drag and drop. Built with React.js, JavaScript and CSS.

Currency Converter
Currency conversion app with live exchange rates, interactive charts, conversion history and LocalStorage. Built with React.js, JavaScript, Chart.js and an exchange-rate API.

Todo Applications
Todo apps with authentication, persistent storage and full task management. Built with React.js, Node.js and MongoDB.
